TENSIONERS + IDLERS

OE SPECIFICATION

- ✓ High Performance OE Bearings.
- ✓ Precision spring rate and alignment accuracy.
- ✓ Rigorous heat, load, and RPM testing to match or surpass OE standards.

WATER PUMPS

OE SPECIFICATION

- ✓ OE Bearings and seal technology.
- ✓ Precision cast housings for perfect fitment and flow.
- ✓ Pressure and flow tested before packaging.

TIMING BELTS

OE SPECIFICATION

- ✓ Same line, same standards.
- ✓ Advanced EPDM Rubber and Aramid Cord construction.
- ✓ Rig tested with OE components for real world durability.

OE PERFORMANCE GUARANTEED

BGA'S RESEARCH & DEVELOPMENT CENTER

Our in-house high-performance rigs test BGA Timing Belt Kits side by side with OE parts under real engine conditions up to 6,000 RPM. Post-test, all components are analysed to ensure quality, performance, and wear levels meet or exceed OE standards.

TENSIONER ▶
Tested for precise tension control and lasting performance.

TIMING BELT ▶
Tested for durability, stretch resistance, and timing accuracy.

WATER PUMP ▶
Tested for seal integrity, flow performance, and leak prevention.

BOLTS ▶
Tested for torque strength, vibration resistance, and reliability.

IDLER PULLEY ▶
Tested for smooth rotation, bearing durability, and wear resistance.

GUARANTEED ORIGINAL QUALITY
