ULTRASONIC HARDNESS

Using the latest equipment our UK labs carry out extensive material hardness tests on all transmission components.

ROUGHNESS

BGA use roughness tests to confirm tolerances and ensure that product quality is maintained.

CV JOINT CLEARANCE

BGA use in-house equipment to analyse CV joints clearances to prevent excessive loads or excessive movements within the CV joint.

LIFE-CYCLE ASSESSMENT (LCA)

Life-cycle assessment (LCA) is a technique utilized on our Drive-Shafts to assess environmental impact on components by testing them to destruction. Years of use are recreated in weeks of testing over different terrain and weather conditions to ensure durability.

BGA Now offers an industry leading 5 Year Warranty across their full range of parts - giving you complete confidence every time you fit a part.
