ELECTRIC VEHICLES... REALITY OR HYPE?

How many plug-in electric cars are on the UK's Roads?

Chart Source: DfT/SMMT

The growth of electric vehicles (EVs) in the UK is driven by environmental concerns, government support, and technological progress.

However, challenges like the need for a dependable charging infrastructure, high costs, reliance on renewable energy for charging, and environmental issues related to battery manufacture and disposal remain. Overcoming these obstacles is key to the sustainable adoption of EVs in the UK's transport sector.

No matter what the future holds, the significant expansion of the electric vehicle market necessitates that we tailor our business strategy to equip our customers with the critical components they require to stay competitive. Consequently, BGA will continue to back the EV transition by expanding our catalogue with an even broader range of EV parts in the upcoming years.

BGA EXPORT SALES DEPARTMENT

As the year drew to a close, the BGA Export Sales Department came together in Swindon to embark on a two-day journey of growth and collaboration. During this time, we engaged in training sessions to enhance our skills, strategic discussions to shape our future, and celebrate and acknowledge our achievements. Thanks to the exceptional team we have across Europe, we are aiming for continued double-digit growth in 2024.

A huge thank you to our customers for your unwavering support. We're gearing up to bring even more energy and innovation in the coming year!

DAVIDE PIASER HAD SOME SPECIAL SHOUTOUTS TO OUR STAR PERFORMERS OF 2023:

The team was rewarded with custom-made sneakers from Venetodoc, symbolising our commitment to quality and performance.
