TIMING CHAIN KIT WITH VVT SPROCKET

SUPERIOR QUALITY TIMING CHAIN FULL KIT.

BGA are delighted to be launching the VVT versions of our top-selling TC7301FK.

These kits differ from each other based on the variations of the VVT sprocket. You can identify the differences by checking the engine code of your vehicle.

TC7301VFK

Designed for the H4B400 engine codes of 0.9 and 1.0 engines.

TC7304VFK

Designed for the H5F engine code of 1.2 engine.

TC7305VFK

Designed for the H4B401, H4B408, H4B410, H4B412, H4B453, H4D400 engine codes of 0.9 and 1.0 engines.

+35 NEW STRUT MOUNTS

Strut mounts, also known as suspension strut mounts or shock mounts, are essential components of a vehicle's suspension system. They play a crucial role in connecting the strut assembly to the vehicle's chassis and providing a cushioned interface for absorbing road shocks and vibrations.

Like any automotive component, strut mounts can fail over time due to various reasons:

Wear and Tear

Over time, the rubber material used in the mount can degrade and lose its elasticity, causing it to become brittle, cracked, or worn out.

Environmental Factors

Exposure to extreme temperatures, moisture, and road chemicals can accelerate the deterioration of strut mount materials.

Poor Quality Materials

These mounts may not be made to withstand the rigours of everyday driving or may have manufacturing defects that make them prone to failure.

Overloading

Excessive weight or overloading of the vehicle can place extra stress on the suspension components, including strut mounts.

Aggressive Driving

Hard braking, sharp turns, and rough off-road use can put additional strain on the suspension system, including the strut mounts.

Lack of Maintenance

Regular maintenance of a vehicle's suspension system is essential to catch and address issues before they become major problems.

Impact Damage

Collisions, pothole impacts, or other accidents can cause damage to the suspension components, including strut mounts.

Age

Even if a vehicle is not driven extensively, the materials can degrade over time due to exposure to the elements.

WATER PUMPS

ENGINEERED TO OUTPERFORM.

Guaranteed to match or surpass OE Quality.

#BESTUNDERPRESSURE

ENGINE TEST RIG SIMULATING REAL LIFE MOVEMENT.

Each BGA Water Pump is thoroughly tested on bespoke built engine simulation rigs to strict Quality Control standards before release to the market. Highlighted here, is endurance testing of the bearing used in Water Pumps - one of the most important elements.

Excessive vibration can cause catastrophic issues elsewhere in the pump. The Mechanical seal & in some cases belt damage can occur from this fault mode.

From rigorous testing, BGA have identified OE faults and re-engineered the BGA pump to avoid premature failure.

90+ YEARS OF GASKET MANUFACTURING

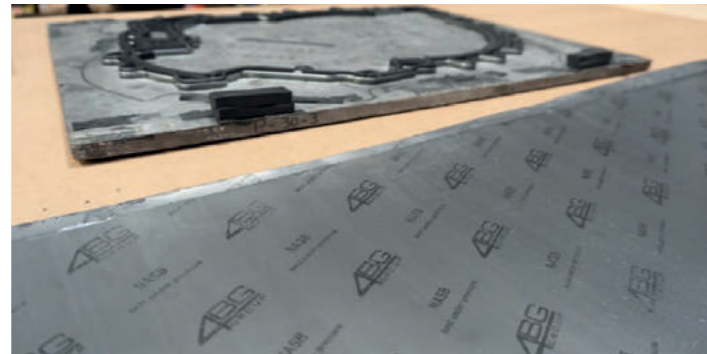

OE MANUFACTURER SINCE 1929.

BGA is the Aftermarket Division of the 4BG Group, established in 1929 and crowned as one of UK's largest privately owned OE Manufacturers for some of the worlds leading vehicle brands.

The British Gaskets Group produce a wide range of Gaskets in the United Kingdom for a diverse range of industries including Automotive, Aerospace, Marine, Railways and Domestic appliances.

4BG Group and BGA Boast 8 manufacturing Factories in the United Kingdom, Europe and the far east.

Being part of 4BG Group gives BGA access to the latest OE manufacturing technologies, innovations, and expertise when it comes to manufacturing gaskets for the global Aftermarket.

BGA offer one of the largest Gasket, Bolt and Sealant ranges in the European Aftermarket, including more than 5,600+ quality references covering in excess of 300,000 applications.

BGA are recognised globally for OE matching quality Gaskets, head bolts and sealant with distribution channels in over 80 countries across the world.

REFERENCES IN RANGE:

- 365+ Head Bolts
- 5200+ Gaskets
- 330+ Conversion Sets
- 970+ Head Gasket Sets
- 1360+ Head Gaskets
- 550+ Inlet Manifold Gaskets
- 700+ Rocker Cover Gaskets
- 420+ Exhaust Manifold Gaskets
- 400+ Oil Seals
